DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP '844 in view of JP '016.

The patent documents JP '844 discloses a vehicle suspension system with an adjustable stabilizer for which the stiffness is adjusted to control roll. The JP '844 documents lacks the disclosure of a wheel stroke detection device used to detect a difference in wheel stroke to adjust the difference in the torsional rigidity of a stabilizer as taught by JP '016. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the JP '844 document with stroke detectors 12L and 12R such as those taught by JP '106 in order to control the adjustment of the stiffness of the stabilizer.
